

## Turf Replacement

There are times when turf needs replacement due to contamination, damage from equipment or extreme wear.

Mexteds uses specialised equipment to offer a fast and efficient turf replacement service.

### Planing and removal

Using our purpose-built planer and loading elevator, we are able to efficiently remove turf in areas such as contaminated cricket wickets and other sports field areas, leaving a perfect surface for the re-laying of new turf with one pass.

### Installation

Mexteds provides installation services, sourcing turf and re-laying using our specialised turf laying equipment that enables us to lay two one-metre-wide rolls in one pass.

### Topdressing

Sand or soil topping is carried out to improve drainage and ensure consistent contours for playing field surfaces.

### Specifications:

Turf planer and turf layer, used in conjunction with laser finishing equipment.
